

## **Product Manager**

**Tallman Bronze** is a medium sized manufacturing company involved in the design, casting, machining, and fabricating of OEM and aftermarket products. We have a technical staff with proven metallurgical expertise in the design of products which meet and exceed performance specifications in the power generation, aerospace, nuclear, military, pulp and paper and steel industries.

We are looking to add a **Product manager** for nonferrous cast products to our team.

### **As our new Product manager you will be responsible for:**

- Management of cast products from quotation through delivery.
- Casting design using SolidWorks
- Preparation of estimates using ERP and custom software
- Providing excellent customer service to ensure that customers' requirements are understood, properly estimated and accurately conveyed in production documents.

### **Skills Required:**

- A minimum of 2 years mechanical design experience using SolidWorks
- 2 years of related industrial experience.
- Analytical and strong observation skills which demonstrate the ability to estimate, coordinate and control customer orders
- Able to organize multiple priorities.
- Strong communication skills.
